

SHURSEAL® PACKAGING SOLUTIONS

# FOLDED-EDGE HAND DISPENSER

You demand secure carton seals, even when applying packaging tape by hand. It's why Shurtape has added the Folded-Edge Hand Dispenser to the ShurSEAL Packaging Solutions family. Designed for manual sealing applications, including L-Clip tape sealing, the Folded-Edge Hand Dispenser is designed with patented Folded-Edge® Technology for reinforced strength and a ready to open seal.

FOLDED **EDGE**®  
TECHNOLOGY  
Reinforced Strength. Ready To Open.

# FOLDED-EDGE HAND DISPENSER

**FOLDED** **EDGE**<sup>®</sup>  
**TECHNOLOGY**  
Reinforced Strength. Ready To Open.

The Folded-Edge Hand Dispenser is unique in construction – patented Folded-Edge Technology folds both edges of the packaging tape along the length of the carton as it's applied, delivering:

## REINFORCED STRENGTH

Increases the strength of the tape edge to keep the seal intact, particularly at its most vulnerable failure point – the major flaps where the tape folds over the edges of the carton. This reduces the risk of the tape being nicked and broken, providing an added layer of security to keep contents secure from damage, contamination and theft.

## READY TO OPEN SEALS

Creates a secure, easy-to-open carton seal that doesn't require a knife or other sharp instrument to open. Essentially, it creates a dry edge that allows the tape to be grasped and removed by hand, reducing the risk of product damage and worker injury attributed to knife cuts.

## ADDITIONAL BENEFITS INCLUDE:

- **Improved wipe-down pressure** as tape is applied, which results in deeper penetration of the tape's adhesive into the carton to produce tamper-evident seals.
- **A retractable/pivoting safety blade** that is shielded from accidental contact. A two-step process ensures the cutting blade is only exposed during deliberate cutting motion, which in turn significantly reduces the risk of worker injury attributed to cuts by the tape dispenser blade.
- **Visible tape length indicators** that provide tab length control – and reduced tape consumption – by allowing the user to easily see how much tape is being dispensed.
- **Single strip tape application** via visible markers that provide straight taping guidance.
